Slip-EZ Coin Folders

The CWS Slip-EZ Coin Folders first came onto the market in 1970. They were designed for the novice collector who had for years complained about coins falling out of old style cardboard holders. The half-moon slits allow coins to enter a pocket and help hold the coin secure. The material used in the manufacture of this product has been successfully market tested for twenty-five years.

**Slip-EZ Coin Folders**

- **Slip-EZ Folders are 5½” x 7½” when closed**
- **Push coin through half-moon slot into pocket - it is held securely in place!**

**Gardmaster Coin Albums**

The CWS Gardmaster Coin Album is our improved version of an old coin album design with many new ideas added and other features improved. The old style hard-to-use screws have been replaced with an easy access “Snappy”. The material used in the manufacturing of this product has had softening agent removed to protect coins and has been successfully market tested for twenty-five years. The thumb tabs on the slides makes it easier to move them in and out of the sheet. We have also added extra holes to the sheets to allow them to fit other brands of albums.

**To place coin in album - pull “slide” to the right using ribbed edge - insert coin - push slide back in.**
